1. Reporting entity:

Discovery Air Inc. (the "**Corporation**") was incorporated on November 12, 2004 under the Ontario *Business Corporations Act* and on March 27, 2006 was continued under the *Canada Business Corporations Act*. The Corporation's Class A common voting shares (the "**Class A Shares**") are traded on the Toronto Stock Exchange ("**TSX**") under the symbol "DA.A". The Corporation also has Class B common variable voting shares (the "**Class B Shares**"), which are not listed for trading on any exchange (the Class B Shares and the Class A Shares are collectively referred to as the "**Shares**"). The address of the registered office is 200, 4915 – 48th Street, YK Centre East, Yellowknife, Northwest Territories, X1A 2N6. The Corporation operates through two business segments, "Aviation" and "Corporate Support and Other". Through direct and indirect subsidiaries, the Corporation operates over 160 aircraft with over 850 team members.

2. Basis of preparation:

(a) Statement of compliance:

The Corporation prepares its interim condensed consolidated financial statements in accordance with International Accounting Standard ("**IAS**") 34 *Interim Financial Reporting*. These interim condensed consolidated financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the Corporation's audited annual consolidated financial statements for the year ended January 31, 2013, which were prepared in accordance with International Financial Reporting Standards ("I**FRS**") as issued by the International Accounting Standards Board.

3. Significant accounting policies:

These interim condensed consolidated financial statements have been prepared using the same accounting policies and methods of computation as the Corporation's most recent annual audited consolidated financial statements for the year ended January 31, 2013, except as noted below.

Effective February 1, 2013, the Corporation adopted IFRS 10 *Consolidated Financial Statements*, amended IAS 28 *Investment in Associates and Joint ventures*, IFRS 11 *Joint Arrangements*, IFRS 12 *Disclosure of Interests in Other Entities*, and IFRS 13 *Fair Value Measurement*. The adoption of these standards had no material impact on the financial statements of the Corporation.

A number of new standards, and amendments and interpretations of standards, are not yet effective for the quarter ended April 30, 2013, and have not been applied in preparing these interim condensed consolidated financial statements. Management is currently reviewing such standards to determine the impact on the Corporation's financial statements.

4. Business combinations:

On February 2, 2012, the Corporation, through a subsidiary of Great Slave Helicopters Ltd. ("GSH"), acquired 100% of Helicopters.cl SpA (formerly, Servicios Aereos Helicopters.cl Ltda) ("Helicopters Chile") and its subsidiaries. Helicopters Chile was acquired due to its good strategic fit with GSH's South American operations, providing helicopter services to domestic and multinational customers in Chile's mining, power construction and forestry sectors. Helicopters Chile has two main operating bases in central and southern Chile, and currently operates a fleet of approximately 10 intermediate and medium sized helicopters. The Chilean Peso is Helicopters Chile's functional currency. Foreign exchange gains and losses arising from translating Helicopters Chile's results and financial position into Canadian dollars are recorded in "Other comprehensive income".

The purchase price included contingent consideration of up to $4.5 million, payable in two installments based on financial performance for the calendar years 2012 and 2013 (contingent consideration is based on a multiple of expected profit before income tax). The Corporation estimated the fair value of the total purchase price to be $6.1 million. The provision for contingent consideration is recorded at its fair value, and will accrete to the estimated amount payable at each of the scheduled payment dates. Subsequent to the acquisition, the first payment was determined to be below the estimate of fair value at the acquisition date, therefore a gain of $1.3 million was recorded in the Corporation's Consolidated Statements of Profit for the year ended January 31, 2013.

The purchase price allocation was completed in the current quarter which resulted in the recognition of intangible assets including trade name and licence valued at $0.5 million, and customer relationships valued at $0.5 million. The goodwill was revised to $1.9 million due to the recognition of these intangible assets.

On May 4, 2012, the Corporation, through a subsidiary of GSH, completed the purchase of the assets of Northern Air Support Ltd. (“NAS”) for $9.3 million. NAS is a helicopter charter company that serves the western Canadian mining, forestry and oil and gas seismic sectors with bases in Kelowna, British Columbia and Rocky Mountain House, Alberta. The acquisition of NAS supports the Corporation’s growth into the British Columbia market and is a good strategic fit with GSH’s operations. The fair value of the NAS assets acquired exceeded the purchase price and accordingly, the Corporation recorded a gain of $0.4 million in the Corporation’s Consolidated Statements of Profit for the year ended January 31, 2013.

A summary of net assets acquired in the business combinations is as follows:

(a) On September 23, 2011, the Corporation closed the private placement of $70,000,005 principal amount of 10.00% secured convertible debentures (the "**Secured Debentures**"). Interest on the Secured Debentures accrues at a rate of 10% per annum and is added to the adjusted principal amount of Secured Debentures on March 22 of each year commencing on March 22, 2012. The original conversion price of the Secured Debentures of $7.50 per Share increases at 10% per annum, and as a result, the original face amount of the Secured Debentures plus all accrued interest will continue to be convertible into 9,333,334 Shares, subject to standard anti-dilution and adjustment provisions.

On March 22, 2013, $7.3 million of accrued interest that is payable-in-kind was added to the adjusted principal amount of the Secured Debentures. As at April 30, 2013, the loan balance included accrued interest of $0.9 million (January 31, 2013 - $6.3 million).

(b) On May 12, 2011, the Corporation closed a $30.0 million issuance of 8.375% convertible unsecured subordinated debentures at a price of $1,000 per debenture (the "**Unsecured Debentures**"), with an additional $4.5 million issued on May 27, 2011 through an overallotment option on the original issue of these debentures. The Unsecured Debentures accrue interest at the rate of 8.375% per annum payable semi-annually and the principal balance is due at maturity on June 30, 2016. At the holders' option, the Unsecured Debentures may be converted into Shares at any time prior to the maturity date at a conversion price of $7.30 per Share, subject to standard anti-dilution and adjustment provisions.

(c) On March 26, 2012, the Corporation entered into a $20.0 million secured term loan agreement. The loan matures on March 15, 2017 and is repayable in monthly instalments of $167,000 plus interest, with the balance due at maturity. The loan bears an interest rate equal to the lender's floating base rate plus 3.00% per annum.

(d) On May 2, 2012, the Corporation entered into a $15.0 million secured term loan agreement and has drawn $13.8 million to date. The loan matures on February 15, 2016 and is repayable through an annual curtailment each February equal to 1/10th of the original amounts drawn and monthly payments of interest. The loan bears an interest rate equal to the greater of: (i) 4.50%, and (ii) the lender's floating base rate plus 1.50% per annum.

(e) On March 26, 2012, the Corporation entered into four secured term loan agreements for an aggregate principal amount of $14.2 million. The loans mature on March 26, 2017 and are repayable in aggregate monthly instalments of $185,000, with the balance due at maturity. The loans bear interest at a rate equal to the one-month Canadian dollar banker's acceptance rate ("**BA rate**") plus 4.55% per annum.

(f) On June 22, 2012, the Corporation entered into a $4.5 million term loan agreement. The loan matures on April 22, 2015 and is repayable in scheduled installments made during September, December, March and June. Four scheduled payments of $500,000 are due during the first year of the loan, four scheduled payments of $375,000 are due in the second year of loan, and three scheduled payments of $250,000 during the final year of the loan, with a final payment of $250,000 due at maturity. The loan bears a fixed interest rate of 9.00% and is payable monthly. The loan is secured by a subordinated general security agreement with the Corporation and certain of its subsidiaries.

The credit facilities contain various restrictive covenants including interest coverage, funded debt to EBITDA (as defined in the lending agreement), liabilities to equity, fair market value of assets pledged to loan balance, as well as other customary covenants, representations and warranties, funding conditions and events of default.

The Secured Debentures require that the Corporation be in compliance with a variety of financial and non-financial covenants. On April 22, 2013 the holders of the Secured Debentures waived the covenant requiring the Corporation to maintain total debt leverage ratio of not greater than 6.00:1.00 for the quarter ended April 30, 2013. With this waiver the Corporation was in compliance with all its debt covenants for the quarter ended April 30, 2013.

Although the Corporation is entering what has historically been its peak earnings season, trailing twelve month EBITDA has exerted pressure on the total debt leverage ratio. Accordingly, the Corporation requested and received an additional waiver for the consolidated total debt leverage ratio covenant for the second quarter ending July 31, 2013.

In addition, lenders' consent is required, among other things, to incur additional indebtedness beyond a defined amount, pay dividends or make other distributions or repurchase or redeem its capital stock, prepay, redeem or repurchase certain debt, sell secured assets, and move aircraft internationally.

Repayments on or in respect of the outstanding loans and borrowings as at April 30, 2013 for each of the next five years and thereafter are as follows:

(thousands of Canadian dollars)		
Within 1 year	$	7,267
Within 2 years		7,120
Within 3 years		14,350
Within 4 years		129,283
Within 5 years		307
Thereafter		2,326
Total	$	160,653

Interest expense on or in respect of loans and borrowings for the three months ended April 30, 2013, was $3.8 million (April 30, 2012 - $3.6 million).

6. Operating line of credit:

On August 1, 2012, the Corporation entered into a committed operating line of credit ("**Operating Line**") that matures on April 9, 2015 and which bears interest at the lender's prime rate plus 2% with an option to use bankers' acceptance rates upon payment of a 3% stamping fee. The Operating Line has a maximum borrowing limit of $15.0 million, increasing up to $25.0 million during the Corporation's peak operating period of March 1 through October 31. Aggregate borrowings are also limited to eligible accounts receivable and inventory, subject to an allowance for specific reserves. The Operating Line, which may be used by the Corporation for working capital and general corporate purposes, is secured by a first charge on the receivables and inventory of the Corporation and certain of its subsidiaries, general security agreements and other customary security agreements. In addition to financial covenants, the Corporation is required to have a nil loan balance for thirty consecutive days during each non-peak operating period.

As at April 30, 2013, the Corporation had available a borrowing capacity of $18.2 million, against which $1.9 million was applied to issue letters of credit and $15.4 million was drawn (January 31, 2013 - nil). The Corporation was in compliance with all applicable covenants.

7. Earnings per share:

(thousands of Canadian dollars, except per share amounts)	For the three months ended			
		April 30, 2013		April 30, 2012
Basic and diluted earnings (loss) per share:

Trade and other payables		**1,648**		3,383
	$	**(9,767)**	$	(12,981)

10. Fair value of financial assets and liabilities:

Fair value estimation:

The Corporation classifies its fair value measurements by reference to the following fair value measurement hierarchy:
1. Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
2. Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
3. Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

Carrying values for assets and liabilities classified as loans and receivables and financial liabilities at amortized cost (excluding loans and borrowings) approximate their fair value due to their short-term nature.

The fair value of the Secured Debentures and Unsecured Debentures as at April 30, 2013 was $101 million (January 31, 2013 - $104 million) as compared to a carrying value of $109 million (January 31, 2013 - $107 million). At April 30, 2013 and January 31, 2013 the fair value of the Unsecured Debentures was based on the closing trade price on the TSX (level 1) and the fair value for the Secured Debentures was based on management's estimates using observable market inputs (level 2).

The fair value of the Corporation's variable rate loans and borrowings approximates their carrying value, as the applicable interest rate is at a floating market rate.

11. Commitments and contingencies:

The Corporation has annual lease obligations for aircraft and premises. During the three months ended April 30, 2013, the Corporation incurred $2.1 million (April 30, 2012- $4.1 million) in operating lease expense. Future minimum lease payments under non-cancellable leases are due as follows:

(thousands of Canadian dollars)		
Within 1 year	$	8,458
Within 2 years		3,404
Within 3 years		2,404
Within 4 years		2,244
Within 5 years		1,950
Thereafter		10,634
	$	29,094

The lease terms range from a period of 1 to 50 years, the majority of which are renewable at the end of the lease term at market rates.

As at April 30, 2013, the Corporation had $0.5 million of restricted cash (January 31, 2013 - $0.5 million), which is required to collateralize contingent exposures and letters of credit as collateral for customer contracts and certain contractual obligations of the Corporation's subsidiaries.

12. Segmented information:

The Corporation has two reportable segments: Aviation, and Corporate Support and Other.

The Aviation segment includes business operations that generate revenues by flying aircraft to serve customers in various industries and governments. This segment includes GSH, Discovery Air Defence Services Inc. ("**Defence Services**"), Discovery Air Innovations Inc. ("**Innovations**"), Air Tindi Ltd. ("**Air Tindi**"), and Discovery Air Fire Services Inc. ("**Fire Services**").

The Corporate Support and Other segment contains operating units which do not meet the basis for inclusion in the Aviation Segment and individually represent less than 10% of the Corporation's total assets, annual revenues and annual earnings. This segment includes Discovery Air Technical Services Inc. ("**Technical Services**"), Discovery Air Mining Services Ltd. ("**Mining Services**"), and certain support functions of Discovery Air (collectively, "**Corporate**").

Effective February 1, 2013, the Aviation segment includes the activities of Innovations as the business development efforts of Innovations are now focused on supporting Defence Services growth initiatives. In addition, the costs of various telecommunication and information technology costs have been transferred from the Aviation segment to Corporate Support and Other as these infrastructure costs are now being managed on a consolidated basis at Corporate.

These changes in segment reporting had no material impact on the Corporation's consolidated statements of financial position, statement of profit (loss), statement of comprehensive income (loss) or statement of cash flows for any periods.

The revenues disclosed in the tables are from external customers. There are inter-segment revenues; however they are eliminated on consolidation. For the three months ended April 30, 2013, Corporate Support and Other segment inter-segment revenue was $0.3 million (April 30, 2012 - $0.1 million).

The Corporation's businesses are, to varying degrees, seasonal in nature. Seasonality and other factors such as weather conditions can affect the comparability of results from one period to another, particularly from quarter to quarter.

Some of the seasonal factors that impact quarterly results are as follows: there is increased demand for the services provided by GSH, Fire Services, Air Tindi, and Mining Services normally commencing in the late spring and continuing through to the end of the summer; Defence Services' revenue-generating opportunities are significantly higher in the February to June and September to November time periods; though Defence Services revenues are relatively predictable over a twelve month period, they can vary substantially from month to month depending on weather conditions and its customers' priorities; weather conditions can have an impact on flight activity from one period to another, especially in the Corporation's fire suppression activities; the Corporation attempts to perform most major repairs and refurbishment during the slower periods of revenue-generating potential; and repair and maintenance on aircraft do not occur evenly throughout the year and the timing of related expenses within a year may vary from one period to another.
